# **Indoor Event Shooting**

# Quiet, accurate and high speed pan-tilt motion for event shooting

## Key points

- Compact size camera and pan-tilt head
- · Quiet, accurate and high speed pan-tilt head
- Pre-set memory function
- Multi-function control
- Maximum control distance: 1 000 m (3 280 ft.)

# Parliament/Hall

# Many cameras and quiet pan/tilt-heads can be controlled from several control rooms.

Convertible cameras (AW-E750/E655/E650) can shoot in dark settings such as parliament, halls or theaters thanks to high sensitivity (Minimum illumination: 0.005 lx).

By using the Multi-function Controller AW-RP655 and five cameras, a total of 250 pre-set memories (50 presets per camera) can memorize 250 seats in a conference hall.

# **Address/Sports Relay**

# Compact size camera and pan-tilt head can be controlled in small event shooting spaces.

Quiet indoor pan-tilt system with no disturbing noise. The pan-tilt head and camera are compact, as well as extremely quiet.

The videographer does not need to move around the hall, and is able to shoot without disturbing the scene

Ideal for wedding or religious ceremonies where the atmosphere and mood are very important.

# **Remote Studios**

# Content production at small, cost effective studios

## **Key points**

- Many cameras can be used in a small studio.
- SDI video system by SDI card (AW-PB504)
- One operator can control many cameras and pan-tilt heads.
- Quiet pan-tilt motion for shooting in a quiet studio

# **Remote Studio**

# A single camera operator can control three cameras in a quiet studio.

One control panel controls three cameras and pan-tilt heads in the studio. By using compact pan-tilt heads, many cameras can be controlled in a small studio. Using the compact live AW-SW350 switcher also enables an operator to produce independently creative images with wipes and other special effects.

## **CATV Studio**

# High quality image SDI recording system for minimizing deterioration of video images.

When equipped with the AW-PB504 SDI card, Panasonic convertible cameras can be easily integrated into a SDI broadcast system to record high quality video with little degradation. Panasonic cameras are an ideal choice for professional studio use.

# Production systems

Studio systems can be configured using optional studio cards.

## **Key points**

- 3CCD (2/3", 1/2" or 1/3") high quality camera Resolution: 850 lines, S/N 67 dB (NTSC)/ 65 dB (PAL)(DNR ON)
   : 860 lines, S/N 65 dB (NTSC)/ 63 dB (PAL)(DNR ON)
- Two types of studio card: Analog (Composite, Component) output card/SDI output card
- Intercom, viewfinder, lens control kit and RCU (remote control kit) can be used for studio system.

## **Production Studio**

A convertible camera can be used as a production studio camera by inserting an SDI studio card.

The 2/3" high quality camera AW-E860 or AW-E750 with the SDI studio card AW-PB506A (with two SDI outputs) can be used as high quality studio cameras in production houses or community stations.

# **College Studio**

A simple, cost effective studio system can be configured by inserting a studio card.

A compact, easy to operate, low-cost system can be set up by inserting a Studio card into the camera, which is ideal for small size studios in schools, companies, etc.

# Multi-purpose systems

High quality images indoors and out make them ideal for everything from live sports coverage to use as ceiling cameras.

# High speed pan-tilt system

# High speed and accurate camera operation can be achieved.

By using the high speed (90 °/s) pan-tilt head AW-PH400 and high quality controller AW-RP400, high-level camera operation for sports relays or music video production can be achieved.

## Weather/traffic information camera

# High quality images can be supplied in any weather conditions.

Weather/traffic camera system with a waterproof, outdoor pan-tilt head.

The camera can be operated by remote control via a PC connection to enable projection of faraway situations on the monitor.

## **HD** camera system

# Panasonic also makes it easy to switch from conventional

As the demand for HD production systems continues to grow, Panasonic is there to support you.

Panasonic's HD models offer the flexibility for use with conventional SD systems, while making you more familiar with the HD production environment.

## 2/3-inch Bayonet Mount

**Multi-purpose HD Box Camera** 

**AK-HC1500** 

## Global multi-format HD/SD compatibility in a compact unit designed for a wide range of applications.

The camera is compatible with multiple formats at worldwide. What's more, original Panasonic devices such as the 14-bit A/D converter, newly developed DSP and 2/3-inch IT-3CCD assure exceptional image quality and reliability. As well as being ideal for a wide range of applications, this high cost performance HD camera helps assure an easy transition from an SD system to an HD system.

\* This camera can be mounted with Fujinon HD 2/3" bayonet mount lenses or Canon HD 2/3" bayonet mount lenses

## Introducing the well-reputed, multi-view display embedded AV-HS400 with new and enhanced capabilities!

- In addition to the multi-view display function, the AV-HS400A now offers green tally display\* and the capacity to edit the names of input materials.
- It also comes with enhanced key functions such as 3D DVE effects and flying key function.
- If directly connected with Panasonic's camera/pan-tilt head\*\*, it may be controlled from the AV-HS400A. Moreover, by also connecting Panasonic's control panel\*\*\* you can switch between and operate up to 5 pan-tilt heads.\*\*
- "TALLY" output doesn't have green tally port

- \*\* Compatible models: AW-PH400/AW-PH405/AW-PH360.

  \*\*\* Compatible models: AW-RP655/AW-RP555.

   The unit is not waterproof so please avoid direct cntact with rain and water.

## System example

# HD camera ideal for live sports coverage and other broadcast applications.

Combining the AK-HC1500 HD Multi-Format Camera with the high-speed, exceptionally quite AW-PH400 Pan-Tilt System lets you shoot and record high-definition, broadcast-quality images. And with the AV-HS400A Live Switcher, you can use transitions and versatile titling effects for results with incredible presence.
