^{*1} When scanning a document larger than A5 size at high resolutions over 600 dpi, the scanning may fail due to insufficient memory. *2 The scanning speed differs depending on the host computer, the operating system, the application, the measuring method, the quantity of data in the image, and the paper type. The scanning speed depends on a measuring method of Panasonic. *3 Use "Thin Paper Feeding Mode" when scanning the document less than 40 g/m^2 (10.6 lb.). For details about "Thin Paper Feeding Mode", refer to the Image Capture Plus, TWAIN, or ISIS help.

*4 About the environmental conditions of Imprinter Unit (KV-SS014),

refer to the "Information" leaflet of the optional imprinter unit. When printing in conditions outside of the imprinter unit's operating environment, the printing result may be faded or printing may not occur.

Digital Imprinter

The "Digital imprinter" enables additional printing to the scanned image data.
