

KV-S1025C/KV-S1020C Specifications

Scanning Face	Duplex (KV-S1025C), Simplex (KV-S1020C) Sheet Feed Scanning
Scanning Method	3-Line Colour CCD with white fluorescent lamp
Scanning Speed*1 (A4, Portrait)	Binary 200 dpi Up to 25 ppm/50 ipm (KV-S1025C) Up to 25 ppm (KV-S1020C) Colour 200 dpi Up to 25 ppm/50 ipm (KV-S1025C) Up to 25 ppm (KV-S1020C)
Optical Resolution (Colour and B/W)	100 - 600 dpi (1dpi step)
Automatic Detection	Double feed detection (Length), Page length detection
Image Compression	Grayscale JPEG Colour JPEG
Image Output	Binary, Gray scale, Colour, MultiStream™ (Colour & Binary or Gray & Binary)
Binary Mode Halftone	Dither, Error Diffusion
Image Control	Auto Binary/Colour Distinction, Multi Colour Dropout, Black Page Removal, Double Exposure, Smooth Background, Automatic Cropping and De-skewing, Dynamic Threshold, Automatic White Level from Paper, Image Emphasis (5 steps), Gamma Correction, Automatic Separation, Noise Reduction, Shadow Removal, Mirror Image, Monochrome Reversing and much more
Other functions	Patch code detection, Control sheet, Separation sheet
Documents*2	Size (ADF) Minimum 48 mm x 70 mm (1.9" x 2.8") Width x Length Maximum 216 mm x 2,540 mm (8.5" x 100") Weight Single 40 - 209 g/m ² (11 - 55 lb) Continuous 40 - 209 g/m ² (11 - 55 lb) Thickness Single 40 - 209 g/m ² (11 - 55 lb) Continuous 40 - 209 g/m ² (11 - 55 lb) Card Up to approx. 0.76 mm (0.03") in thickness + embossing (ISO standard 7810 ID-1 card scanning including embossed card)
Automatic Document Feeder	Up to 50 sheets (80 g/m ² , 20 lb), 3 hard cards (ISO 7810 ID-1)
Long Paper Mode	Up to 2.54 m (100 inches)
Interface	High-Speed USB 2.0
Power Requirement	AC 200 - 240 V 50/60 Hz, AC 100 - 120 V 50/60 Hz
Power Consumption	Scanning mode 32 W (KV-S1025C), 24 W (KV-S1020C) Idle mode 22 W (KV-S1025C), 14 W (KV-S1020C) Sleep mode Less than 12 W (KV-S1025C, KV-S1020C)
Operating Environment	Temperature 15°C - 30°C (59°F - 86°F) Humidity 30% RH to 80% RH
Storage Environment	Temperature 0°C - 35°C (32°F - 95°F) Humidity 10% RH to 80% RH
External Dimensions*3 (W x D x H) (Without Feed Tray)	With Stand 317 mm x 182 mm x 196 mm (12.5" x 7.2" x 7.8")
Weight*3	KV-S1025C: Approx. 4.2 kg with stand (9.3 lb) KV-S1020C: Approx. 4.1 kg with stand (9.1 lb)
Accessories	CD-ROM (2 CDs): Drivers and Utilities for Windows Driver software ISIS® (AIM MS161S standard)/TWAIN Application software RTIV, Quick Scan Pro DEMO, ABBYY® FineReader 7.0 Professional*4 Feed Tray, Mixed batch card guide (Pre-installed), AC adaptor & Power Cord, USB Cable
Options	Roller Exchange Kit KV-SS030 (Double-feed prevention roller x 2, Paper feed roller x 1) Double-feed prevention roller: 50,000 sheets life Paper feed roller: 100,000 sheets life Roller Cleaning Paper KV-SS03
System Requirements	Computer IBM® PC/AT or compatible PC with a CD-ROM drive CPU Pentium® III 1 GHz or Higher Interface High-Speed USB 2.0 Operating System Windows® 2000/XP Memory 256 MB or more Hard Disk Min. 200 MB free space (except for data file)

*1: The scanning speed depends on the test environment. The scanning speed differs depending on the host computer operating environment or application.
*2: "Weight in pounds" of paper represents the weight of 500 (432 x 559 mm/17 x 22 inches) sheets.
*3: Dimensions and weight are approximate.
*4: This application software is not included in certain destinations.

Dimensions (Including attached stand)

As an ENERGY STAR® partner, Panasonic has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

ISO 9001 Quality Management System

Our business processes which produce document, information and network products, from manufacturing to marketing, conform to ISO 9001 Quality Management Systems standard. Design, development, manufacture, installation, repair and maintenance of document, information and network products, their associated devices and consumables. In addition, the plants outside Japan have acquired ISO 9001 certification.

ideas for life

Colour Document Scanner

KV-S1025C
KV-S1020C

Colour

impressive

- Versatile document handling for today's business needs
 - Virtually any type of paper
 - ID cards — including embossed hard cards
 - Mixed paper and hard card batch scanning
 - Long paper scanning (EKG & monitoring systems)
 - Double feed prevention roller system
- Advanced image enhancement and processing
- Easy to operate — Auto application launcher

Panasonic®

MG-C470EE 0604 Printed in Japan

The Ideal Choice for Your Front Office Document Scanning Needs.

Virtually any type of document, from business card size to legal size, from thin onion skin paper to thick hard ID cards, single sided or double sided, the new KV-S1025C/KV-S1020C can scan them all in colour or black and white. Fast and reliable, these compact but powerful scanners come with intelligent RTIV™ image capturing software that maximises the potential of document scanning with precision reproduction and versatile processing. All of this in a quiet, space saving design that will fit comfortably in most front-office environments — even tight counter-tops and reception areas. The KV-S1025C/KV-S1020C from Panasonic — the ideal front-office document filing solution.

Desk Side Sleek and feature-rich, the KV-S1025C/KV-S1020C can easily be set up on your desktop or at your desk side for convenient access and maximum efficiency. Not only can you scan standard colour business documents, but also business cards, multi-part forms, heavy-stock or thick originals, and even documents of different sizes and thicknesses can all be scanned at the same time — smoothly and easily.

Reception

The KV-S1025C/KV-S1020C's small footprint allows it to conveniently fit into small spaces, such as reception counters. And since small, thick documents such as ID cards or credit cards can be scanned continuously, you can electronically capture the card's data providing increased accuracy and a more efficient process. These powerful scanners can even combine paper documents; such as registration forms, records and signed releases, with a hard ID card in a single scan.

High Speed Colour Scanning

25 ppm/50 ipm High Speed Duplex*¹ Scanning

Despite its compact size, the KV-S1025C is ready to scan full-colour double-sided originals at a high speed of up to 25 ppm/50 ipm. Thanks to its high-resolution 3-Line Colour CCD and advanced image processor, these scanners quickly create clean, crisp, clear and safe digital documents for your electronic filing and content management needs.

*1 KV-S1025C only

Mixed Documents & Multiple ID Card Feeding

Many different types of documents can be scanned thanks to the scanner's advanced automatic document feeder and feed roller system. In fact, multiple documents with thicknesses ranging from 40 g/m² to 209 g/m² index (11 lb to 55 lb) can be scanned at the same time. And these scanners were designed to be able to combine paper documents along with a hard ID card; such as a driver's license, in single batch. You can even scan a stack of hard cards, including embossed cards continuously via the auto document feeder.

Double-Feed Prevention Roller System

While some scanners emphasise double-feed paper detection, Panasonic's emphasis is double-feed prevention. A newly developed roller material and document feed mechanism effectively prevents most paper jams and double-feeding. And should a feeding error occur, sensors are incorporated to detect the error and warn the operator.

Easy Maintenance

Designed for the business environment, its clam-shell design makes it easy for the operator to clean and maintain. And when the long-life rollers are in need of replacement, they can be exchanged in seconds. It even incorporates a replaceable lens cover to keep potential service costs to a minimum.

Advanced Imaging

Thanks to a 3-line colour CCD (charge-coupled device) image sensor with wide-range focusing capability and a high-performance, long-life fluorescent lamp, documents can be clearly imaged and scanned at high resolution. With the KV-S1025C's dual CCD image sensors, both sides of the document are captured simultaneously, effectively doubling its speed.

Image Enhancement Technology

Panasonic has developed a new generation and highly integrated ASIC (Application Specific Integrated Circuit) which is combined Image Input, Image Correction, Image Processing and Image Output. This architecture enables advanced imaging functionality to reside inside the scanner. The result is a powerful set of on-board image processing capabilities in a very compact design.

Automatic Application Launcher

At the touch of a button or simply by inserting a document into the feeder, the scanner can be configured to automatically launch one or more document capture software applications including Panasonic's RTIV utility. How much easier can it be?

Auto Erasure Security

Security is a key concern for many businesses, institutions and government agencies. That's why Panasonic has incorporated a technology that automatically erases the scanned data stored in its image memory.

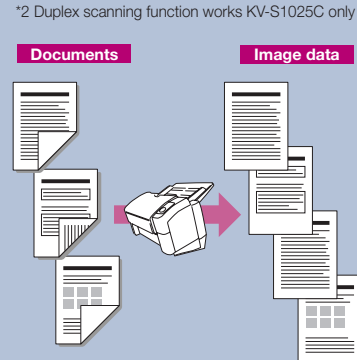

Versatile applications

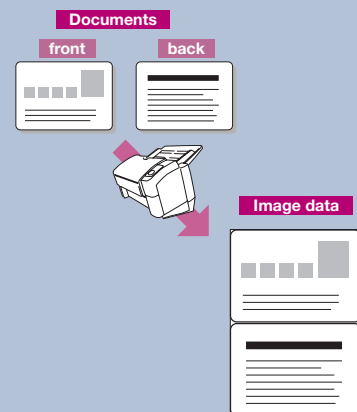

No need to pre-sort
Auto Colour/Monochrome Distinction
Thanks to Auto Colour/Monochrome Distinction, you can mix colour and monochrome (B/W) originals at the same time for greater efficiency and reduced data storage.

Reduced storage space
Blank Page Removal²
Blank pages are automatically deleted during scanning to keep the scanned file size to a minimum. This allows you to scan a batch of documents that include blank pages without the need to eliminate them during a pre-sorting process.

Two-in-one convenience
Double Exposure³
Double Exposure automatically scans then saves two-sided documents into a single page file; ideal for ID cards such as driver's licenses and insurance cards, as well as checks and receipts.

No more fuzzy background
Smooth Background
Smooth Background analyses images at scan time for background colour content and outputs images with the background colour solidified. It increases viewing clarity and reduces JPEG output file size

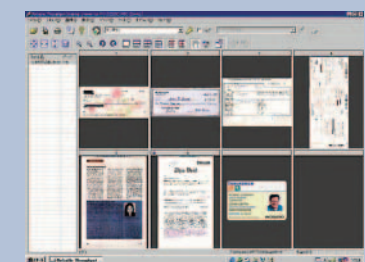

Pre-printed form scanning
Multi Colour Dropout
With Multi Colour Dropout, you're no longer limited to removing only reds, greens and blues from pre-printed forms. Any colour or colour range can be selected for removal for more accurate OCR processing. And you're not limited to only one colour — you can select up to three or even drop all colours saving only black.

Single pass for dual output
MultiStream™
The MultiStream™ function generates both colour and monochrome scanned data with a single scan. You can produce binary data for OCR (optical character reader) and save in colour at the same time. This effectively doubles the scanner's output.

No post-processing
Auto Colour Cropping/De-Skew
Documents of various sizes can be scanned without having to pre-sort the documents by paper size. Auto Colour Cropping crops the scanned image to its actual size while Auto De-Skew automatically corrects skewing. No need for post-processing or re-scanning.

Readability and accuracy
Dynamic Threshold
With the Dynamic Threshold function, the background density is automatically detected section by section and the scan setting (brightness control) is automatically adjusted for clearer results as well as OCR accuracy.
